

Bee-Bot®

B

ee-Bot is an exciting new robot designed for use by young children. This colorful, easy-to-operate, and friendly little robot is a perfect tool for teaching sequencing, estimation, problem-solving, and just having fun!

Sturdy construction and colorful design entice children to put Bee-Bot through its paces. Directional keys are used to enter up to 40 commands which send Bee-Bot forward, back, left, and right. Pressing the green GO button starts Bee-Bot on its way. Bee-Bot blinks and beeps at the conclusion of each command to allow children to follow Bee-Bot through the program they have entered and then confirms its completion with lights and sound. Children want to use Bee-Bot over and over and are inspired to enter ever more creative and complex command sequences.

Bee-Bot is a great introduction to the Pro-Bot robot and the on-screen Logo turtle as well as a learning tool in its own right. It can be utilized in a variety of subject areas including math, art, and social studies. A variety of Bee-Bot accessories enhances its teaching potential.

Bee-Bot moves in 6" steps and 90° turns. Compact size and durable materials make Bee-Bot child- and classroom-friendly. Bee-Bot operates on three AA batteries (included) and has both power and sound switches. Bee-Bot is equally adaptable to home and school environments and boosts enthusiasm for experimentation and learning wherever it is used.

Bee-Bot[®] Accessories

Bee-Bot Command Cards \$24.95

Each Bee-Bot command card pictures one of the Bee-Bot control buttons. Children may use the cards to record their command sequence as they push Bee-Bot's buttons. Command cards provide a visual record of the Bee-Bot program that students may follow as it is executed. Cards may also be used to create games and challenge young learners.

Bee-Bot command cards come in decks of brightly-colored, laminated cards that stand up to long use.

Bee-Bot Snap-on Shells \$29.95

Change Bee-Bot's color and personality with snap-on shells. Each shell fits snugly over Bee-Bot and easily snaps into place. Shells are designed with holes through which command buttons protrude for easy access while covering the rest of Bee-Bot's body. Shells may be used as the base for modeling and transforming Bee-Bot into different objects that can be used in a variety of lessons. Use a red shell to make Bee-Bot into a fire truck, a white shell to make Bee-Bot into a ghost, a green shell into a turtle, or challenge children to use their creativity and imagination with ideas of their own.

Bee-Bot snap-on shells come in packs of 15 and include five each red, green, and white shells.

Bee-Bot Lessons \$100.00

Bee-Bot Lessons contain 100 lesson plans for using Bee-Bot across the curriculum in pre-K to second grade classrooms. Lessons are divided into 10 subject areas and each includes its objectives, instructions for implementation, standards met by the lesson, and differentiated instruction for students at varying levels. *Bee-Bot Lessons* includes hundreds of printable illustrations that can be used to implement the lessons with the Bee-Bot Card Mat.

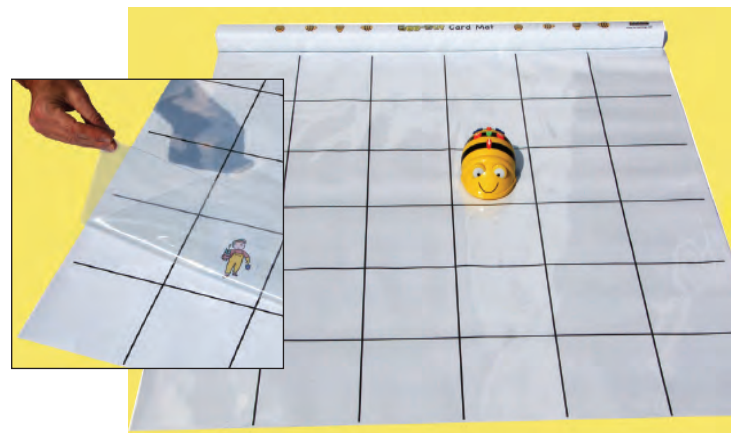

Bee-Bot Lessons comes in a 3-ring loose-leaf binder for easy copying, a CD with PDF illustration files, and a license to use the materials at a school site.

Bee-Bot Card Mat \$69.95

The Bee-Bot Card Mat provides an ideal surface for Bee-Bot. The Bee-Bot Card Mat is a six by six white vinyl grid with each square representing one Bee-Bot step. The grid is covered by an attached clear vinyl sheet to facilitate placing image cards on the grid. The grid reinforces Bee-Bot navigation plans while the clear sheet protects letter, number, and other subject area cards and pictures. The images in *Bee-Bot Lessons* are designed to fit on the Bee-Bot Card Mat—or make your own—creating a Bee-Bot classroom learning station that students are excited to use.

The Bee-Bot Card Mat is a 36" x 36" white vinyl grid covered by a clear vinyl sheet securely attached at one edge.
