

Writing your initials in Logo

NAME: _____

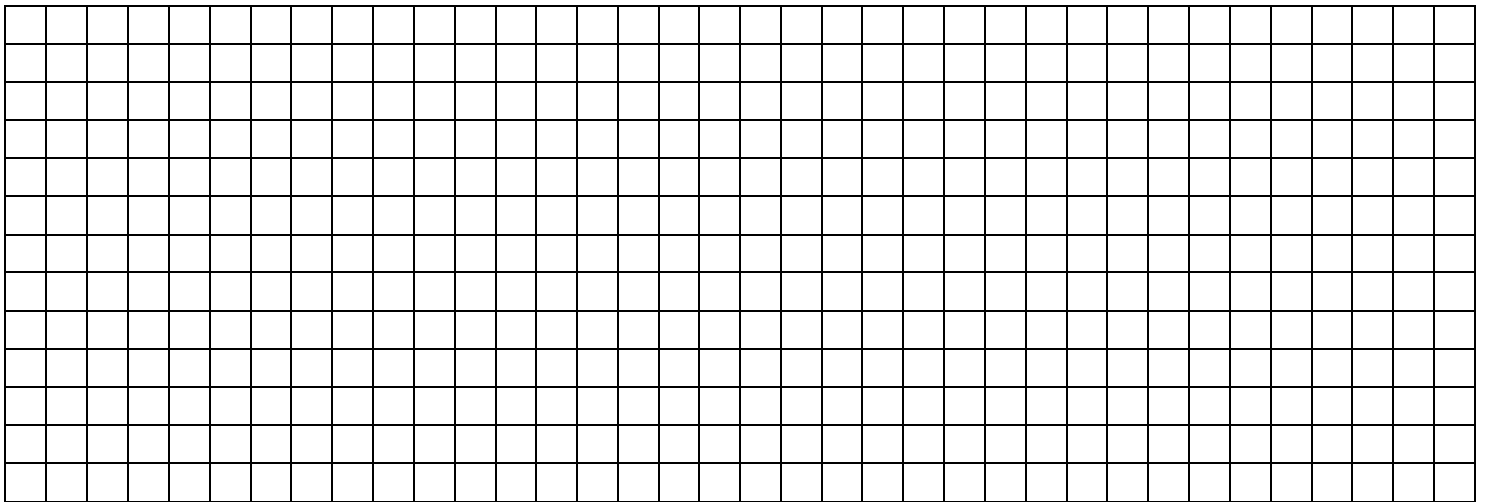

In the beginning, using Logo to complete a complex task such as writing your initials can be challenging, but with a little bit of help you can do it.

Here are some tips to help you work out a solution:

- Edit → Undo drawing (erases the last line the turtle drew, but leaves the turtle in the new location)
- PENERASE and the reverse of the previous command (erases the last line you drew, and returns the turtle to its previous position)
Example: FD 50 can be erased with PENERASE BK 50
- PU and PD (pick the pen up when moving between objects and put the pen down when you want to draw again)

Initials are easy!

Using a scale of FD 5 for each box, draw your initials in the grid below:
