R. Mike Mullane, Do You Ears Pop in Space? Surprising Questions About Space Travel.

Mary Pope Osborne, Midnight on the Moon, Ages 5-8

Franklyn M. Branley, Floating in Space (grades 7-9)  
Fine Arts: Vincent van Gogh, Painting of The Starry Night  
Van Gogh painted heatedly to achieve the results for The Starry Night. It pulsates with stars of burning yellow while planets spiral into space. In the distance, the hills and mountains appear to quiver and radiate the day's heat. Overall, the viewer finds the universe's wild actors that swirl against the night sky restful.
