

Take Another LOOK at LOGO

Logo is the innovative computer language that was developed to harness the power of the computer as a learning tool. Logo creates an environment that invites students of all ages to explore and discover. By doing so they develop planning, problem-solving, and critical thinking skills while gaining first-hand experience with math and logic.

Logo was developed as computers first made their way into the classroom and is a time-tested educational resource. Based on the "no floor, no ceiling" philosophy, Logo can be used with the youngest to the most advanced learners. Logo was popularized by its colorful "turtle graphics" which draw on students' innate creativity. Motivated to create pictures and designs on the computer screen by giving commands to the "turtle," students are soon engrossed with measuring, estimating, and trial and error while discovering new ideas and concepts in the process. As a complete computer language, Logo grows with students and allows them to access all aspects of the computer including animation, music, data handling, interactivity, and graphical programming.

Terrapin Logo comes ready for

- Windows (95 and up)
- Mac Classic (OS 8.1 and up)
- Mac OS X (all versions)

Complete turtle graphics

- Up to 100 turtles
- Millions of colors

Built-in RCX controls

On-line Help

Terrapin Logo is the latest version of Logo from the world's most experienced Logo company. Terrapin Logo embodies the original Logo philosophy and can be immediately used by anyone who has used Logo in the past or even those with no experience at all. At the same time, Terrapin has taken advantage of the more powerful capabilities of the latest computers by integrating them into Terrapin Logo. As students progress in their learning, they discover that there are virtually no limits at all to what they can do with Terrapin Logo and they can progress as far as their imaginations can take them.

Terrapin Logo comes with a complete set of printed manuals, including a *Tutorial*, *Reference Manual*, *Getting Started Guide*, and *Quick Reference* and Terrapin offers a wide-range of Logo-related materials to enhance Logo use in a variety of contexts. Economical multiple computer and site licenses are available for schools. With its power to motivate students and its flexibility across grade levels and subject areas, Terrapin Logo is the computer resource every school should have.
